New Product Release: DataHabitat Enterprise Edition for Microsoft Great Plains™

San Jose, CA, July 12, 2004 – DataHabitat Corporation, a data warehousing and Business Intelligence company, announced today the release of DataHabitat Enterprise Edition for Great Plains™.

DataHabitat utilizes the best-of-breed data warehousing and OLAP cube technology to simplify reporting and data analysis tasks while providing a powerful, flexible, easily customizable solution that is designed for the needs and budgets of mid-market companies.

Highlights of DataHabitat Enterprise for Great Plains™:

- DH Cubes: DataHabitat now offers the best-of-the-breed multidimensional OLAP capabilities. Drill down on selected data and across related dimensions with unparalleled ease.
- Crystal Reports™ compatibility: With our data warehouse framework, it is easy to build and modify custom reports, and reports run very fast.
- DH ETL for MS SQL Server™ builds an open and adaptive data warehouse using a non-programming, wizard-driven interface.

About DataHabitat:

DataHabitat is the leading provider of Business Intelligence (BI) solutions that help mid-market companies improve business performance. By providing the right information to the right people at the right time, DataHabitat enables management and operations to make better, and more informed decisions. Along with powerful BI development tools that focus on ease of use and advanced customization capabilities, DataHabitat also provides packaged BI solutions for users of leading mid-market accounting and finance applications (such as Best Software, Great Plains, and AccountMate). The core of all DataHabitat solutions is their DH ETL that builds open and adaptive data warehouses using a non-programming and wizard-driven interface.
